

# Viewing Referred Visits & Appointments

Last Modified on 03/28/2019 4:12 pm EDT

## Selecting your Records

You can use the filter tools at the top of the 'Visits' page to control the collections of visits you see. This page will include both past visits and upcoming appointments.

## Record Availability

Full details for a Visit are made available after the record has been finalized. If the clinician has created a 'Clinicians Note to Veterinarian', that content will be available even if the record is not finalized.
